

Polyester film label tape

Waterproof, oil-proof, high temperature resistance, low temperature resistance

Material: Synthesized by PET film, environmental protection and pollution-free

Product features: waterproof and oil-proof, no residual glue, tear resistance, dimensional stability, suitable for sticking on a flat surface, long-term use.

Operating temperature: -40°C~+149°C

Certification: Pass ROHS environmental certification

Applicable models: GT1000, GT100, GT2000, GT3000, GT3600

Recommended use: fixed assets, indoor equipment identification

The Verma label tape is directly printed on the label paper by means of thermal transfer printing technology. Integrated cassette, easy to install, no ink or dust, peace of mind and more environmentally friendly. The label has a variety of colors and widths to choose from.

The label is waterproof, oil-proof and not easy to wear. Even in harsh environments, it can be adhered to the required site perfectly and stored for a long time.
